

ZYRO

Wireless Video Transmission

6-Page Sales Portfolio

Low latency. Long range. Anti-interference. Flexible multi-node deployment.

Built for UAV / robotics / field
ops

Sales brochure updated with latest Mesh visual

Why ZYRO

A product family for wireless imaging, video backhaul, and data connectivity across mobile and distributed platforms.

Low Latency

Designed for real-time imaging and control scenarios.

Long Distance

Built for beyond-line field deployment and remote backhaul.

Anti-Interference

Optimized for demanding RF environments and stable links.

Flexible Networking

Point-to-point, relay, and Mesh-style topologies for varied missions.

Core Product Matrix

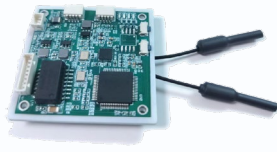

ZYRO Air	Digital wireless video link
ZYRO Link	Embedded image/data link module
ZYRO Mesh	Self-organizing multi-node network
ZYRO Cam	Wireless camera node
ZYRO Air Analog	Analog air link option

Product Lineup

ZYRO Air

Digital air unit for wireless video transmission.

ZYRO Link

Compact integration module for OEM/embedded systems.

ZYRO Mesh

Multi-node wireless network for extended coverage.

ZYRO Cam

Wireless imaging node for rapid deployment.

ZYRO Air Analog

Analog solution for specialized applications.

Flagship Systems

ZYRO Air

For mobile video links and airborne deployment.

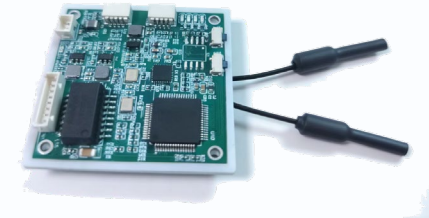

- Digital video transmission
- Compact deployment format
- Built for UAV / FPV style systems

ZYRO Link

For OEM integration and embedded wireless connectivity.

- Compact module architecture
- Suitable for custom platforms
- Wireless imaging and data link integration

ZYRO Mesh - Updated Sales View

Self-organizing networking for distributed video access and relay expansion.

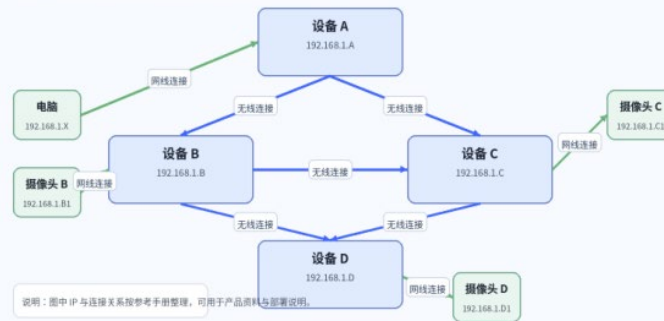

1

ransmission System / Product Brief

ZYRO Mesh 典型近距离多模块组网拓扑

任意一台接入电脑可查看其他节点所接摄像头视频；模块自动入网，不区分主从。

ZYRO | Wireless Imaging & Data Link Products

- Automatic node joining
- Multi-node video access
- No master/slave dependence
- Relay and multi-hop coverage

Typical Application Scenarios

UAV & FPV

Airborne video transmission and telemetry relay.

Robotics

Remote visual feedback for unmanned ground platforms.

Emergency Response

Rapid field deployment in complex environments.

Multi-Camera Networks

Shared wireless backhaul across distributed nodes.

Sales-ready portfolio

A focused ZYRO lineup covering digital links, integrated modules, wireless cameras, and Mesh networking for professional field applications.

Suggested next step

Share this deck with customers first, then follow with the single-product brief that best matches their application.
