

0.5 W Daya Bay Test Report

1. Huizhou Daya Bay Video Link Range Test

1.1 Test Objective

To evaluate the 20 km video transmission performance of the in-house-developed system in an air-to-ground scenario along the Daya Bay coastline.

1.2 Test Environment

Test date: May 14, 2026

Test scenario: The test was conducted along the Huizhou Daya Bay coastline. The UAV was flown at an altitude of 80 m at one end of the link, while the ground station at the other end was mounted on a 1.8 m tripod. The target link distance was 20 km.

Hardware: Four sets of in-house-developed 0.5 W equipment (two sets at each end: one test unit and one backup unit), two test laptops, six antennas, and one UAV test platform.

Software: iPerf traffic-generation software, CRTdebug diagnostic software, and VLC media player.

1.3 Test Results

Test locations:

UAV takeoff site: Wushantou Greenway Observation Deck, Huiyang District, Huizhou, Guangdong Province

Ground-side video receiving site: Bijia Lover's Bay, Huidong County

Measured distance between the two sites: 19.6 km
